

Market Watch 42

June 2012†

Jointly produced by:

WFP-World Food Programme, Nepal
 MoAD- Department of Agriculture, Agribusiness Promotion and Marketing Development Directorate (ABPMDD)
 FNCCI/AEC-Federation of Nepalese Chamber of Commerce and Industries/Agro Enterprise Centre
 CIPF-Consumer's Interest Protection Forum

HIGHLIGHTS

- **Most food prices monitored in various markets have shown relatively stable over the past one month due to improved supply conditions as compared to May 2012.**
- **As per the latest macroeconomic situation report released by Nepal Rastra Bank, the price index of food and beverage increased by 7.1 percent as compared to 16.0 percent in the same period last year.**
- **Supply situation across the country is so far normal. Traders in the hill and mountain markets have begun to stockpile food commodities as a preparation for likely disruption of food supplies in the monsoon.**

NATIONAL MARKET DEVELOPMENT

Price

In the retail markets regularly monitored by MoAD and WFP, most prices showed slightly an upward trend over the past one month. The national average price of coarse rice increased by 1.9 percent to Rs. 34.2 per kilo, while the price of wheat flour slightly declined by 0.4 percent to Rs. 35.9 per kilo. Prices of pulses such as black gram and broken lentil went up by 0.1 percent and by 3.5 percent to Rs.109.2 and Rs. 94.6 per kilo respectively. Likewise, prices of soybean oil and red potato climbed up by 1.4 percent and 1.7 percent to Rs. 144.5 per liter and Rs. 34.8 per kilo respectively. Prices compared to March 2012 showed an upward trend, while compared to June 2011, most prices indicated a declining trend with few exceptions of red potato and soybean oil.

Prices in the regional markets also showed the trend similar that of the national trend. The price of coarse rice indicated an upward trend, while that of wheat flour showed a declining trend in all markets. However, compared to June 2011, most prices showed mixed trend. Wholesale prices regularly monitored by FNCCI/AEC in the five large markets (Birtamode, Kathmandu, Butwal, Surkhet and Dhangadhi) indicated an upward trend of coarse rice and black gram while that of edible oils such as soybean oil and mustard oil showed a declining trend over the past one month.

Nepal Oil Cooperation (NOC) has again increased the price of diesel and kerosene oil by Rs.4.0 to Rs.93.0 per liter. Such a continuous increase in fuel prices is a major concern for food security due to its likely contribution to the rise of transport costs, thereby raising food prices.

The latest macroeconomic situation report released by Nepal Rastra Bank showed the year-on-year inflation at 8.7 percent in mid-May 2012 as compared to 9.5 percent over the same period last year. The price index of food & beverage increased by 7.1 compared to 16.0 percent, while the price index of cereal grains increased only by 1.9 percent as compared to 13.5 percent. However, the price index of transport increased by 18.0 percent compared to 10.1 percent increase over the same period last year.

Supply

Supply situation across the country is so far reported to be normal. According to WFP Field Monitors, food stocks mainly in the hill and mountain markets have increased due to smooth operation of transport services after lifting a series of bandhs from May 29, 2012. As the monsoon has already started in the country, food supplies are likely to disrupt in the markets mainly connected only with fair weather road networks. This needs to be monitored closely in the next couple of months.

Outlook

Prices of most commodities are likely to increase in the future due to an increase in diesel price which will likely contribute to increase transport costs and then further contribute to the rise of food prices mainly in the hill and mountain markets. However, price of winter crops such as wheat flour will likely remain stable in the next month.

A week-delay in monsoon rain than its normal date combined with insufficient rainfall has affected timely plantation of paddy across the country and the growing maize mainly in the hilly belt, indicating negative outlook for the summer crop production compared to last year.

Largest changes in prices of key commodities

Commodity	Price Rs/kg or liter	% change 1month	Observation
Diesel	93.0	4.5	Appreciation of US\$ against Nepalese rupees.
Vegetables (cauliflower, tomato and cabbage)	various	10 to 22	Decline in supply due to lean season.

Average price over 12 month period*

Percentage change in prices** (1 month & 1 year)

† Prices relate to the Nepali month of Jestha 2069.
 * Prices are from markets listed on the back of this report, not including 'Hill & Mountain No Road' markets.
 ** Change in price considers all markets shown in this report

▲ Price increase above normal price fluctuation

▶ Normal price fluctuation

▼ Price decrease below normal price fluctuation

Price fluctuation is considered normal if the price change is within 5% for 1 month, or within 10% for 3 months or within 15% for one year.

* This is the price of NFC subsidized rice, as there is virtually no other stock.
