

# Market Watch 73

## January 2015†

Jointly produced by:

WFP-World Food Programme, Nepal  
 MoAD-Department of Agriculture, Agribusiness Promotion and Marketing Development Directorate (ABPMDD)  
 FNCCI/AEC-Federation of Nepalese Chamber of Commerce and Industries/Agro Enterprise Centre  
 CIPF-Consumer's Interest Protection Forum

### HIGHLIGHTS

- **In January 2015, retail prices of most food commodities monitored in 12 markets across Nepal showed marginal fluctuations, with a seasonal decline in newly harvested crops, such as rice and potato, and a marginal increase of other commodities, such as pulses and edible oils.**
- **Overall inflation rate in January 2015 was 6.8 percent. The food and beverage group was higher at 9.0 percent, as were several sub-groups: milk products and egg (17.4 percent), legume varieties (13.7 percent), spices (11.1 percent) and fruits (10.8 percent).**

### Price

In January 2015, retail prices of most food commodities monitored across the country showed a mixed trend. On a month-on-month basis, the retail price of coarse rice declined by 1.1 percent, while that of wheat flour remained relatively stable. Prices of black gram and broken lentil increased by 3.4 and 0.3 percent respectively. Likewise, prices of soybean oil and mustard oil went up by 1.3 and 1.5 percent respectively. However, the price of red potato went down sharply by 13.8 percent, while that of chicken meat marginally increased by 2.8 percent. Compared to three months earlier, most prices showed a declining trend with the exception of pulses (broken lentil and black gram). However, compared to the same period last year, most prices showed an upward trend (with the exception of soybean oil and chicken meat). Overall, the price of most commodities over the past 12 months, as shown in Figure 1, showed an upward trend with expected seasonal fluctuations (with the exception of red potato).

Prices in regional markets (see Figure 2) showed somewhat different trends than national averages, with an upward trend for coarse rice in the mountain and hill markets with road access and stable prices in the major consumer markets of Kathmandu and Pokhara. The price of wheat flour showed similar trends. However, the price of broken lentil showed an upward trend (except in the major consumer markets).

Wholesale prices regularly monitored by FNCCI/AEC in the five large markets of Birtamod, Kathmandu, Butwal, Surkhet and Dhangadhi showed an upward trend with the exception of the price of coarse rice over the past one month. As shown in Table 1, wholesale prices monitored in the Kalimati Fruits and Vegetables Market showed a high seasonal fluctuation: prices of bitter gourd, pointed gourd, brinjal, okra and pumpkin increased by more than 15 percent due to a reduction in supply, while that of cabbage, cauliflower, radish, broad leaf mustard and dry onion decreased by more than 10 percent month-on-month.

In January 2015, the overall consumer price index (CPI) released by Nepal Rastra Bank was 211.2, a decrease of 0.6 percent month-on-month. The inflation rate, as measured by the year-on-year increase in the CPI, was 6.8 percent. The food and beverage group of the CPI was 257.3, a decrease of 3.1 percent month-on-month, but an increase of 9.0 percent year-on-year; several sub-groups showed higher year-on-year increases: milk products and egg (17.4 percent), legume varieties (13.7 percent), spices (11.1 percent) and fruits (10.8 percent). The non-food and services group of the CPI was 177.8, an increase of 1.7 percent month-on-month and 5.1 percent year-on-year.

### Supply

The supply situation across the country is normal due to increased road access and smooth operation of transportation services. As a result, adequate quantities of food commodities are available, even in rural markets with road access.

### Outlook

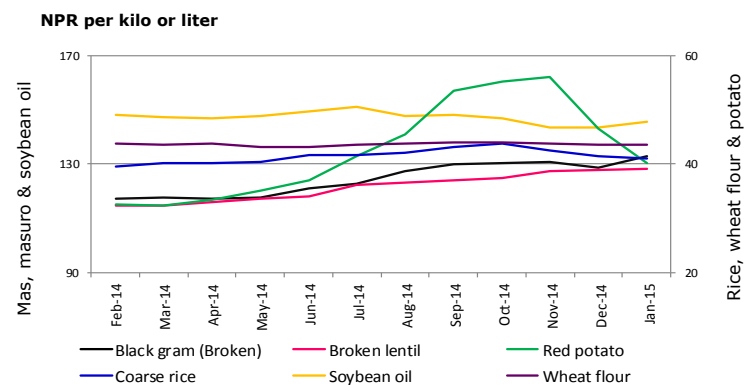

Most food prices are likely to remain stable or fluctuate marginally in the next month as a result of improved supplies, increased road access and smooth operation of transportation services.

The outlook of winter crops, such as wheat and barley, is expected to be good due to timely rainfall across the country.

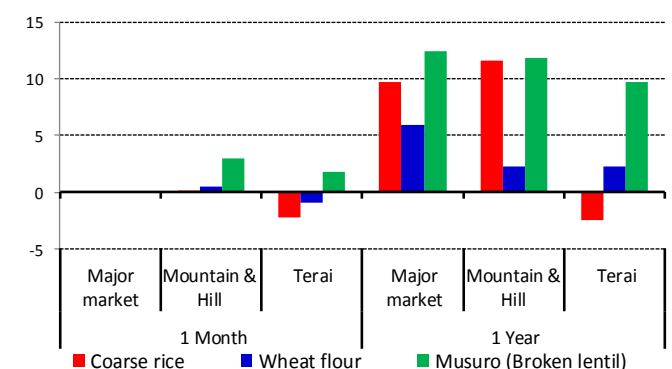

**Table 1: Largest changes in commodity prices (month-on-month)**

Commodity	Price NPR/kg or liter	% change 1 month	Observations
Bitter gourd, pointed gourd, brinjal, okra and pumpkin	various	> 15	Decrease in supply due to lean season
Cabbage, cauliflower, radish, dry onion, potato and broad leaf mustard	various	> -10	Increase in supply due to harvest season

**Figure 1: Average retail price over 12-month period\***

**Figure 2: Percentage change in retail prices\*\* (1 month & 1 year)**

† Prices relate to the Nepali month of Poush 2071.

\* Prices are from markets listed on the back of this report, not including 'Hill & Mountain - No Road' markets.

\*\* Change in price considers all markets shown in this report.

▲ Price increase above normal price fluctuation

▶ Normal price fluctuation

▼ Price decrease below normal price fluctuation

Price fluctuation is considered normal if the price change is within 5% for 1 month, or within 10% for 3 months or within 15% for one year.
